

Inventory Pro

Our standard software product, **Inventory Pro**, manages all aspects of manufacturing and distribution including:

- Inventory
- Purchasing
- Shipping/Order Processing
- Work Orders/Bills of Materials
- Asset Management
- Reports
- Bar Coding
- Multiple Warehouses
- Optional Web-Enabled/
E-Commerce Integrated Interfaces
- Accounting System Interface

Inventory Pro is available in several editions to best meet your needs:

- **Inventory Pro for Windows** utilizes standard Microsoft® Access® databases and is designed for smaller applications with 10 or more concurrent users.
- **Inventory Pro SQL Server** is designed for midsize to larger applications with unlimited concurrent users.
- **Inventory Pro for Oracle**, the most robust edition, is designed for the largest applications with unlimited concurrent users.
- **Inventory Pro Online** enables data access for visibility to employees, customers, and vendors throughout the globe.

Hardware/Software Requirements:

The standard LAN-based **Inventory Pro** GUI is based on Microsoft® Access 97/2000® which requires a Microsoft® Windows® 95/98/2000 or NT v4 desktop environment to run. A Pentium® 166MHz PC with 32 MB of RAM and 100 MB of free disk space is required and any printer with a standard Windows driver can be used. Windows-NT® v4.0 is the standard server environment for **Inventory Pro**.

“By taking advantage of Inventory Pro’s flexibility and the excellent support provided by CISS, OnTime Services has quickly taken a commanding lead in our chosen market where competitors are much larger, better funded, and multinational. Our customers, world leaders in their fields, tell us we were chosen for our strong Inventory Control and Communication systems. Thanks, CISS. We couldn’t have done it without you.”

Malcolm Matthews, Partner
OnTime Services, LLC

Inventory Pro – Inventory Systems Software

Computerized
Inventory
Systems
Specialists, Ltd.

**Our scalable
Inventory Pro Systems
keep your business
on track and
running smoothly –
no matter what your
size or industry.**

After years of providing successful custom software solutions, CISS has developed **Inventory Pro** as a standard inventory management package. Customers throughout the world are turning to CISS and our **Inventory Pro** System to solve their inventory processing needs. The reasons are simple . . . **Inventory Pro**:

- Puts inventory data at the fingertips of users in real time throughout the world with our world wide web module.
- Provides mainframe scale inventory management without mainframe scale costs.
- Is a comprehensive, fully functional manufacturing and distribution system.
- **Inventory Pro is not industry specific!** Our “complete-off-the-shelf” (COTS) system solutions are so versatile, we can meet virtually any requirement across all industries, including:
 - government agencies
 - third-party warehouse operations
 - e-commerce sites
 - major insurance providers
 - asset management companies
 - telecommunications companies
 - paper manufacturers
 - publishers
 - retail operations
- Can be easily customized to meet any unique process requirements.
- Can be interfaced with your existing accounting system or any corporate systems.
- Runs on standard (off-the-shelf) hardware; no specific hardware is required.
- **Is quick and easy for employees to learn!** (Based on Microsoft® Windows® software, training is a snap because keystrokes are so familiar.)

Whether you have a single location, warehouses throughout the globe, or the need to interface with other corporate systems, we have a system for you!

You can rely on us to transform your paper-based inventory system into an automated one with a flexible, easy-to-use application that will save you time and money. Now that's the smart way of keeping track.

After over 15 years of building custom software solutions, CISS has evolved into a major provider of standard inventory management software packages. Based in Allentown, Pennsylvania, we service our customers with programming support located at both our home office and satellite office in Nevada.

Microsoft, Windows, NT, and Access are either registered trademarks or trademarks of the Microsoft Corporation. Pentium is a registered trademark of Intel Corporation.

“Five years ago CISS provided us with our complete order entry/inventory control system that is customized to our specific needs. Last year CISS rolled out a web-based application of our system that is the solution for real-time control of our sales/inventory at our other facilities. This year, CISS will enhance our e-commerce abilities on our site. Their solutions have been cost effective, timely, and fully supported after the sale. We'd recommend them to anyone.”

Rob Loose, Jr., Vice President
MASLO

Technical Support

You can count on us to keep your inventory operation running smoothly with 24-hour, seven-day-a-week technical support on all our products.

Real-time electronic support is available via e-mail and through dialup connections.

Additional Options

If you are looking for the whole package, we can provide it!

CISS can turn your vision into a reality. CISS can help you analyze your current working environment, assess your future needs, and provide the most cost-effective solutions for your operation. Because **Inventory Pro** is scalable, you can begin with a smaller, more affordable system architecture and grow your system as your business expands. CISS can even provide you with the hardware you need. We can install the hardware and the software and train your users. From vision to reality, CISS can provide you with a single-source turnkey solution.

“Inventory Pro has provided us with a cost-effective solution for all of our inventory and purchasing needs. The system is fast, flexible, and has helped us improve customer service and reduce costs.”

John McLaughlin, Director of Quality
Merge Technologies
