

# Inventory Pro

*The flexible, easy-to-use inventory system that keeps your business running smoothly.*

## Inventory Pro functions by module:

### Inventory

- Locator system that allows you to name locations and use multiple warehouses
- Classification of products (models, revisions, shades, etc.)
- Locate and move, cycle counting
- Serial/lot number tracking
- Insert pictures of your inventory items
- Fixed or open warehouse locations
- Cost and price per item
- Direct receiving and direct issuing
- Repair orders
- Fast browse, search, and filter
- Set reorder levels, min and max levels
- Automatic monthly demand calculation in units, days, or months
- Bill of materials, kits, assemblies
- Track A, B, C, D movers

### Shipping/Order Processing

- Order entry
- Allows separate “bill to” and “ship to” addresses
- Archives units when shipped for tracking purposes
- Commits inventory when order is entered
- Prints pick list, packing list, bill of lading, and invoice
- Required shipping dates
- Customer list
- Shipping carriers list
- Types of transportation
- Prints a listing of all outstanding orders, completed orders, canceled orders, and all orders that need to ship today

### Purchasing

- Purchase order entry for inventory item assets or “one-time buy” items
- Inbound appointment scheduling
- Suppliers’ catalog with alternate parts cross reference
- Link or unlink purchasing to inventory
- Automatic generation of purchase orders
- Fast browse all purchase orders (canceled, completed, outstanding, partially received)
- Purchase order receiving

### Work Orders

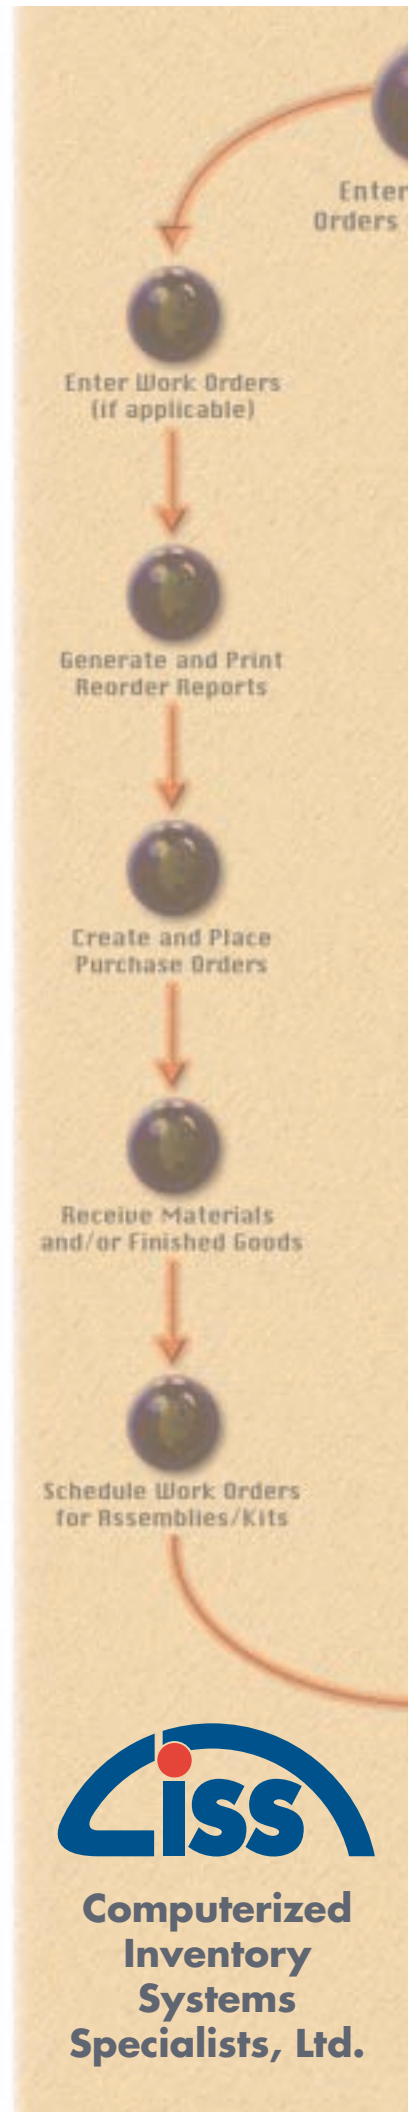

- Detailed work orders for kits and assemblies
- Detailed work orders for assets
- Automatically removes parts from inventory as work orders are completed
- Commits in-stock components when order is entered
- Track all phases (requested, open, scheduled, started, completed, and canceled)

### Assets

- Asset management
- Intangible asset usage (software license management)
- Depreciation (define your own formulas)
- Asset tags and tracking
- Classification
- Insert pictures of your assets for easy identification
- Warranty, serial number, and specification tracking

...and more

*The smart way of keeping track.*

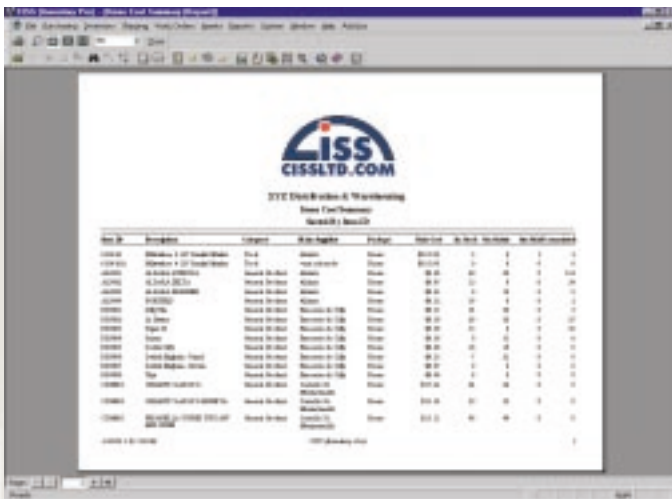

**Computerized  
Inventory  
Systems  
Specialists, Ltd.**

## Easy to customize!

**Inventory Pro** allows you to customize field names with a simple right click of your mouse. You can change our field names and software messages to match your industry terminology and even establish custom configurations. Each workstation can have its own unique configuration of **Inventory Pro**!

## Add-in Manager

Use **Inventory Pro**'s add-in manager to create your own in-house customization of the system or contract with CISS or a third party to do the work for you. The database is a standard SQL-compliant relational database.

The screenshot shows a window titled 'Inventory Pro' with a logo for 'CISSLTD.COM' and the text '3750 Division & Transferring'. Below the logo is a table with the following columns: Item ID, Description, Category, Unit of Measure, Price, Stock, On Hand, On Order, and Reorder Point. The table contains several rows of data.

## Security

System security in **Inventory Pro** allows you to share information with customers, employees, and vendors while protecting the integrity of the data. You assign the read, modify, insert, or delete privileges for each user or group all the way down to the field level. Local and remote users will only have access to the data you want them to see. This built-in security allows the system to provide vendor managed inventory (VMI) and e-commerce solutions within **Inventory Pro**.

## Accounting System Interfaces

**Inventory Pro** has a standard integrated interface to Sage's Business Works™ accounting system. This interface is sold separately and completes a total Enterprise Resource Planning (ERP) solution. If you already have an accounting system, **Inventory Pro** can be customized to interface with it.

*Get dynamic reporting capability by sorting and filtering as needed to create the report you want.*

## Generate all the reports you need!

**Inventory Pro** includes a robust reporting system that allows you to query virtually every aspect of the system and to format the report as your needs dictate. Plus, data is organized in a hierarchical tree format, which allows you to quickly browse an entire family of information. If you need additional reports that are not available in our standard package, no problem. We can customize them for you.

## Our reporting system includes:

- Each **Inventory Pro** report has many sorts and filters, allowing you to specify particular data within a reporting category.
- Our database is Internet ready with html/ASP reporting features that show your data in real time on the world wide web.
- You can preview each report on screen and then easily print only the pages you need.
- Analyze data or create your own reports, graphs, and/or charts with Microsoft Excel® or other OLE-compliant applications.
- Print reports and all documents on letterhead that is scanned into the system or add your logo to each report.

*The smart way of keeping track.*
